Product information

Loquendo TTS

Award-winning, multilingual text to speech engine. Loquendo TTS is the only speech provider on the market to offer an emotional component, a major advance in speech technology that gives Loquendo's voices truly lifelike expression and a far wider emotional range.

Loquendo ASR

Robust, speaker-independent speech recognition technology.

Loquendo Speaker Verification

Uses the voiceprint as a biometric to ascertain an individual's identity.

All Loquendo technologies are available for server, multimedia and embedded applications and share the same core engine.

Company profile

Loquendo meets all the requirements for the development of any kind of flexible speech-enabled service. It is the only speech technology vendor that provides a complete product line for servers, desktop, and embedded, guaranteeing the same wide range of languages and the same core engine in all these environments.

The product portfolio includes: Text To Speech, Automatic Speech Recognition, Speaker Verification, MRCP Server, VoiceXML Platform.

Currently available languages include U.S. and U.K. English, American Spanish, Mexican, Chilean and Argentinian Spanish, Castilian, Catalan, Brazilian, Portuguese, Italian, German, Esperanto, French, Dutch, Greek, Mandarin Chinese, Swedish, Turkish, Canadian French and Polish in both male and female voices, with more under development.

Loquendo has its headquarters in Italy and offices in Germany, France and Spain.
